## **COMPOUNDING SOLUTIONS TO ADD TWO NEW COMPOUNDING LINES**

**Lewiston, Maine** – Compounding Solutions has announced that they will be expanding their compounding capabilities with the addition of two new co-rotating twin screw extruders. These two new compounding lines will bring the company's total to 11, with sizes ranging from 18mm to 50mm.

These two new extruder models offer the latest technology in compounding including features that allow for increased volume and efficiency, while maintaining the high quality standards of the company.

The addition of these extruders will allow for increased capacity and decreased research and development times, as well as, aid in new product and process development.

“Adding these extrusion lines speaks to our strong commitment to improve our technology and expand our capabilities to benefit our customers”, states Scott Neal, Owner & General Manager of Compounding Solutions.

The first of these additions is expected to arrive in March, while the second is expected in July.

### **About Compounding Solutions**

Compounding Solutions is an industry leader in producing quality specialty compounds for the medical device industry, a leader in technological advancement, and has a wealth of knowledge in materials selection and development. The company was started in 1999 with the purpose of becoming the leading compounder for the medical device industry. Since then, the company has completed two building expansions to get to the current facility of 60,000 sq. ft. The current facility includes eleven compounding lines, including these two new additions, ranging from 18mm to 50mm, warehouse and office space, as well as a state of the art 7,000 sq. ft., controlled environment white room for medical compounding.
