

Discounted 1st time Medical Compound Orders in 2018

Are you developing the next great, life-saving medical device?

Compounding Solutions is here to help you reduce material costs.

Through 2018, Compounding Solutions is offering a **\$5/lb price discount** on 25 lb and 50 lb first time medical compound orders.**

Unsure of what the best material is for your design? Let the material experts at Compounding Solutions help you find the best material solution and save you money at the same time in development.

**All subsequent follow up orders of the same material(s) will be at the true quoted price. This offer is valid on R&D medical extrusion compounds only. Not valid on color concentrates.

For use in a variety of medical device applications consider:

MOBILIZE

Our Mobilize friction reducing additive, developed and researched for the medical device industry, provides lubricious properties and can reduce surface friction of polymers by 20-40%. This results in processing advantages and cost reduction in production.

Boost RO

Our Boost RO radiopaque additive is a proprietary filler that can be used with typical catheter materials. The radiopaque strength of Boost RO allows for lower loading levels to be used to achieve the desired radiopacity.
