COMPOUNDING SOLUTIONS INTRODUCES DEFEND RX UNIVERSAL ANTIMICROBIAL MASTERBATCH FOR MEDICAL DEVICES

Lewiston, Maine – Compounding Solutions LLC, a global leader in custom medical plastics compounding, has recently announced the launch of a new universal antimicrobial masterbatch under the Defend Rx brand name utilizing the silver based antimicrobial technology from BioCote®.

Defend Rx antimicrobial masterbatches have been designed and tested for use in a wide range of medical device applications to combat negative effects of microbes such as bacteria and mold that can cause odors, staining and material degradation.

Defend Rx antimicrobial masterbatches offer a lower cost, lower inventory option – with order quantities as little as one pound – using a universal medical polymer carrier that is compatible for use in all the widely used medical polymers, including polyolefins, ABS, polyamides, PEBA's, TPU, and TPE. The use of Defend Rx masterbatches is customizable based on the desired efficacy rate of the device application. Sterilization of medical devices using Defend Rx is not affected as the recommended method of the resin manufacturer can still be used.

About Compounding Solutions

Compounding Solutions is an industry leader in producing quality specialty compounds for the medical device industry, a leader in technological advancement, and has a wealth of knowledge in materials selection and development.
